

EDUCATION

Sharda University, Greater Noida, Uttar Pradesh

2022 – 2026

B.Tech in Information Technology

SKILLS

Languages:	Python, JavaScript, TypeScript
Web & Frameworks:	React.js, FastAPI, HTML, CSS, REST APIs
Databases:	MySQL, Supabase, PostgreSQL
Core CS:	Data Structures & Algorithms, OOP, DBMS, Operating Systems
Tools:	Git, GitHub, Docker, CI/CD
AI & LLMs:	LLM API Integration (Gemini), Retrieval-Augmented Generation (RAG), Prompt Engineering

EXPERIENCE

Software Development Intern — Ineuron Intelligence Pvt. Ltd, Bangalore*May 2024 – Jun 2024*

- Built a console-based banking application in Core Java (OOP, file handling, collections), simulating authentication, deposits, and withdrawals across a modular multi-user system.
- Automated transaction recording and validation through custom file-handling logic, removing manual verification for every transaction processed.
- Refined system logic and error handling with mentors and the dev team, shipping a stable CLI application aligned with clean-code standards.

PROJECTS

AI Interview Platform [\[GitHub\]](#) [\[Live Demo\]](#)*Tech: FastAPI, PostgreSQL, JWT, React.js, Gemini AI*

- Built and deployed a full-stack AI interview platform with JWT authentication and PostgreSQL persistence, generating role-specific questions via Gemini AI across 10+ FastAPI/SQLAlchemy endpoints.
- Deployed across Render, Vercel, and Neon Postgres, sustaining 99%+ uptime through internal load and stability testing.

AI-Powered Author Support Automation System [\[GitHub\]](#) [\[Live Demo\]](#)*Tech: FastAPI, React.js, Python, Supabase, Gemini AI, n8n, REST APIs*

- Designed a FastAPI + Gemini AI query-orchestration pipeline handling intent classification, confidence scoring, and escalation logic for a BookLeaf Publishing (Business).
- Integrated Supabase workflow data with a lightweight FAQ knowledge base, simulating multi-channel support (WhatsApp, email, Instagram, dashboard chat) via n8n-triggered FastAPI workflows.
- Deployed frontend on Vercel and backend on Railway with documented APIs and workflow logs, keeping the architecture modular and maintainable.

AI-Powered Document Intelligence System [\[GitHub\]](#) [\[Live Demo\]](#)*Tech: FastAPI, React.js, Python, MongoDB, RAG, REST APIs*

- Built a full-stack RAG application with FastAPI and MongoDB to extract and query information from PDF, audio, and video files, cutting manual lookup time by ~60%.
- Implemented a retrieval-augmented generation pipeline with the Gemini LLM API, isolating uploads with unique document-level IDs to eliminate cross-document data leakage, and deployed via Docker, Vercel, and Render.

Algo Visualizer [\[GitHub\]](#) [\[Live Demo\]](#)*Tech: HTML, CSS, JavaScript, React.js, Node.js, MongoDB, LLM API*

- Built an interactive DSA learning platform in React.js and Node.js, animating step-by-step execution for 10+ data structures and algorithms, backed by MongoDB.
- Integrated an AI-powered explanation module using an LLM API to generate step-wise algorithm walkthroughs and time-complexity insights.

Blog Desk – Full Stack Blogging Platform [\[GitHub\]](#) [\[Live Demo\]](#)*Tech: FastAPI, PostgreSQL (Neon), JWT, React, Vercel, Render*

- Built and deployed a production-ready blogging platform using FastAPI, PostgreSQL, JWT Authentication, React, Render, and Vercel.
- Developed 10+ secure REST APIs with search, pagination, authorization, and user-specific content management using SQLAlchemy ORM.
- Integrated cloud database (Neon PostgreSQL) and implemented secure authentication using bcrypt and JWT, following modern backend development practices.

ACHIEVEMENTS & CERTIFICATIONS

- Presented research paper "PAPERTRADEX — Simulated Trading on Previous Day Market" at ICAIM 2025, contributing academic insights to financial simulation models. [CERTIFICATE](#)
- Completed "Introduction to Prompt Engineering" (30 hrs), Sharda University, Jan – Apr 2025. [CERTIFICATE](#)
